BANDINFO

When all you have is a hammer, doesn't everything around you look like nails? When all you ever had is burning down in front of you and all that's left is a buzzsaw, doesn't everything around you seem to be a wood?

When five young hearts only have their endless sincerity, friendship and the wish to give birth to their voice and thoughts everything becomes a huge arena, and every night could be the last time they use to sing or even play guitar, to set everything on fire...

A ghosttrain fueled with passion, an aimless crusade so pure and dangerous... Welcome to the world of The Heartbreak Motel. A deathrockmonster, dark and sick like a cold winternight, although almost innocent and beautiful. Dark driven rock without any compromises, full of dynamic and energy. Rough fragments swallow bittersweet melodies without any melancholy. They take no prisoners, they give you freedom from a guillotine, darling.

These boys never hide or sink their heads...other bands like Beatsteaks, Backyard Babies, Randy, Nada Surf, The Bones and a thousand more had to feel this during the past 200 shows, when these hellchilds entered the stage.

After releasing the album "9 Lives of a Tiger Cat" they're ready to explode and set free themselves from this snakepit full of bugs and whores... A merciless haunt is on the run... so better watch out or do you prefer to die!?
